I found this great Wiki article on the Ubuntu wiki that I wanted to share to all those folks that need a whitepaper on how to upgrade Ubuntu to the latest release. I have not yet implemented it, but I will surely do and let you know how it goes.

Ubuntu Wiki Upgrade Whitepaper (<https://wiki.ubuntu.com/BreezyUpgrade?highlight=%28upgrade%29>)

I have also attached the whitepaper in PDF format for your convenience.

Let me know how your upgrades go?
