CacheBox: Scaling Your ColdFusion Applications

version 1.3.2

CacheBox is an enterprise caching engine, aggregator, and API for ColdFusion applications. It is part of the ColdBox ColdFusion Development Platform, but it can also function on its own as a standalone framework so it can be used in any ColdFusion application or framework.

The Definitive Guide To The ColdBox Platform

version 2.6.3

ColdBox is an event-driven convention based ColdFusion Development Platform. It provides you with a set of reusable code and tools that you can use to increase your development productivity, and it provides you with a development standard when working in a team environment. ColdBox is comprehensive and modular which helps you address most infrastructure concerns of typical ColdFusion applications. It also goes places that other frameworks don't.
